

Evidence-Based Mental Health

Contents

November 2008 Vol 11 No 4

EBMH Notebook

- 97** The STAR*D trial: the 300 lb gorilla is in the room, but does it block all the light?
 *Simon Hatcher*

- 99** Unravelling factor analysis *Khalida Ismail*

- 102** *Et al*

Prognosis

- 105** Partial syndromes of eating disorders in adolescence are associated with adverse health outcome in adulthood

- 106** Risk of death from natural causes increased in people with psychiatric admissions

Diagnosis

- 107** Common mental disorders in primary care in India: little to distinguish five commonly used screening instruments

Therapeutics

- 108** Review: Individual behavioural therapy reduces symptoms of depression

- 109** Mood and anxiety disorders: differences between long- and short-term psychotherapies in work ability, but not employment

- 110** Adolescents with SSRI-resistant depression: CBT plus antidepressant switch more effective than medication switch alone

- 111** Adjunctive aripiprazole improves symptoms in antidepressant refractory major depressive disorder

- 112** Review: Insufficient evidence on Huperzine A for Alzheimer's

- 113** Review: Cholinesterase inhibitors and memantine consistently but marginally improve symptoms of dementia

- 114** Review: Paliperidone reduces symptoms of schizophrenia and schizophrenia-like illness

- 115** Second generation antipsychotics reduce treatment discontinuation rates compared with haloperidol

- 116** Little difference between haloperidol, risperidone and olanzapine in weight gain after 1 year of treatment

- 117** Review: Cognitive remediation improves cognitive functioning in schizophrenia

- 118** Transdermal methylphenidate more effective than placebo for treating ADHD

- 119** A parenting programme does not affect behavioural problems in toddlers

- 120** Borderline personality disorder: STEPPS improves symptoms

- 121** Carers of people with dementia: no benefit of adding befriending initiative to usual care

- 122** Timely encouraging letters increase attendance at first consultations at outpatient psychiatric clinics

- 123** Review: Substance use disorders respond to psychosocial interventions

- 124** Review: Short stay hospitalisation does not increase readmissions compared with long stay

Aetiology

- 125** Use of antidepressants in pregnancy does not increase risk of postpartum haemorrhage

- 126** Deployment with combat exposure increases the risk of new-onset PTSD

- 127** Maternal exposure to death of a first degree relative during first trimester of pregnancy increases risk of schizophrenia in offspring

Prevalence

- 128** Global WHO survey: poor physical and mental health more prevalent among women who have experienced intimate partner violence

Electronic pages

- e1** Purpose and procedure
